Professional Summary

I am a 23-year-old international student from Russia, now studying Game Programming at Centennial College in Toronto. I have 5 years of freelance experience in game development, mostly with Unity and C#. I can create full games and systems, but I always focus on honest work that follows Unity's best practices. I adapt quickly to new places and tasks. I am ready to help with game projects and learn more in a team.

Education

Full Stack Programmer Diploma

Synergy Moscow College, Moscow, Russia

2020 – 2024 (3.5 years)

- Learned programming skills for web and software.
- Focused on practical projects.

Experience

Freelance Game Developer

Self-employed (via platforms like Kwork and others), Remote

December 2020 – Present (5 years)

- Developed full games and mechanics using Unity and C#.
- Worked on freelance projects one after another, without fixed schedule.
- Created systems like player controls, UI, and levels for clients.
- Used best practices from Unity docs and my experience to make code work well, but I know it may not always match all industry standards.
- Profile on Kwork: https://kwork.ru/user/anerongames

Unity Tutor

Freelance (via Discord and Russian platforms), Remote

March 2023 – May 2023 (3 months)

- Taught Unity basics to several people who wanted to start developing fast.
- Explained how to set up projects and code in C#.
- After that, gave paid consultations on their game projects.
- All students started successful development.

Skills

- Programming: C# for Unity (strong in making mechanics and systems).
- Tools: Unity Engine, Visual Studio, GitHub.
- Design: Adobe Photoshop CC, Adobe After Effects.
- Audio: FL Studio.
- Languages: English (B1 level / COMM 159), Russian (native).
- Other: Quick learner, honest work, focus on quality results.
